

# TABULA GCC SOVEREIGN USD BONDS UCITS ETF

(USD) - ACCUMULATING | TGCC | ISIN IE000L1I4R94

## Investment objective

The Tabula GCC USD Sovereign Bonds UCITS ETF (USD) - Accumulating (the Fund) aims to track the ICE Gulf Cooperation Council Government Bond ex-144a Index (EGCC Index), less fees and expenses.

## About the index

The Index provides exposure to USD-denominated sovereign bonds issued by six GCC countries: Saudi Arabia (A2), the UAE (A3), Qatar (AA3), Oman (BB3), Bahrain (B1) and Kuwait (A1). The Index applies a liquidity filter and only includes bonds with remaining time to maturity of at least 1 year and a minimum amount outstanding of US\$500m in face value.

The Index has a 25% country limit. Countries that exceed the limit are reduced to a 25% index weight and the face value of each of their bonds is adjusted on a pro-rata basis. Similarly, excess weights are redistributed proportionately to the face value of bonds of all other countries. The Index includes US registered securities, RegS securities and Eurobonds, but 144a securities are excluded.

A detailed methodology is available in the documents section of [tabulaim.com](https://tabulaim.com)

## Investment process

The ETF invests in a portfolio of sovereign bonds that reflects the composition of the Index as far as practicable.

## Key risks

- **No capital protection:** The value of your investment may go down as well as up and you may not get back the amount you invested.
- **Liquidity risk:** Lower liquidity means there are insufficient buyers or sellers to allow the Sub-Fund to sell or buy investments readily. Neither the Index provider nor the issuer make any representation or forecast on liquidity.
- **Counterparty risk:** The Sub-Fund may incur losses if any institution providing services such as safekeeping of assets or acting as a derivatives counterparty becomes insolvent.
- **Credit risk:** The issuer of a financial asset held within the Fund may not pay income or repay capital to the Sub-Fund when due.
- **Emerging markets risk:** Issuers from emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include a greater 'liquidity risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
