Key risks

- **No capital protection:** The value of your investment may go down as well as up and you may not get back the amount you invested.
 - **Liquidity risk:** Lower liquidity means there are insufficient buyers or sellers to allow the Sub-Fund to sell or buy investments readily. Neither the Index provider nor the issuer make any representation or forecast on liquidity.
 - **Counterparty risk:** The Sub-Fund may incur losses if any institution providing services such as safekeeping of assets or acting as a derivatives counterparty becomes insolvent.
 - **Credit risk:** The issuer of a financial asset held within the Fund may not pay income or repay capital to the Sub-Fund when due.
 - **Emerging markets risk:** Issuers from emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include a greater 'liquidity risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
- Fully Accessible Route (FAR) risk:** The scheme became effective in 2020 for investment by non-residents in government securities (G-Sec). This scheme enables non-residents to invest in eligible G-sec without investment limits. This is a relatively new regulation and there is no guarantee that it will continue to function in the long term or during stressed market conditions.
