# Tabula EUR IG Bond Paris-aligned Climate UCITS ETF (EUR) a Sub-Fund of Tabula ICAV (ISIN: IE00BN4GXL63) (the “Sub-Fund”)

EUR Accumulating (the “Share Class”)

Investment Manager: Tabula Investment Management Limited

Management Company: KBA Consulting Management Limited

## Objectives and investment policy

The Sub-Fund is passive and has the objective to track the performance of the Solactive ISS Paris Aligned Select Euro Corporate Bond Index

- The Sub-Fund will seek to achieve its investment objective primarily through investment in a portfolio of investment grade fixed rate corporate bonds that, as far as practicable, reflects the composition of the Index.
- The Sub-Fund will use a sampling strategy and therefore may not hold every constituent of the Index and may not hold constituents in the same proportions as their weightings in the Index. When sampling is used, the Investment Manager will use industry standard tools that are readily available to all investment funds employing a sampling strategy. Financial Derivative Instruments (FDIs) may be used for direct investment purposes. The use of FDIs is expected to be limited for this Share Class.
- All index constituents must be constituents of the Solactive Euro IG Corporate Index. The Index is constructed in such a way to screen the underlying bonds to meet the EU Paris aligned benchmark criteria. Exclusions of the index include: violations of social norms (e.g. UNGC), controversial weapons, tobacco, revenues from fossil fuels and significant negative environmental impact according to UN SDGs 12-15. The index is constructed to achieve a 50% initial reduction in GHG emissions against its parent index and a 7% year-on-year decarbonisation.

- The Share Class of the Sub-Fund will accumulate income in their value.
- This Sub-Fund may not be appropriate for short-term investment.
- The Share Class is denominated in Euro, the Sub-Fund’s base currency.
- In normal conditions, Authorised Participants may deal in shares directly with the Sub-Fund. Other investors can deal in shares daily through an intermediary on stock exchanges on which the shares are traded.

This indicator is based on historical data and may not be a reliable indication of the future risk and reward profile of the Share Class. The risk category shown is not guaranteed and may shift over time. The lowest category (Category 1) does not mean ‘risk free’. The Share Class is rated 3 due to the nature of its investments and the frequency of price movement which include the following risks which may impact the value of the Share Class or expose it to losses.

- No capital protection: The value of your investment may go down as well as up and you may not get back the amount you invested.
- Liquidity risk: Lower liquidity means there are insufficient buyers or sellers to allow the Sub-Fund to sell or buy investments readily. Neither the Index provider nor the issuer make any representation or forecast on liquidity.

- Counterparty risk: The Sub-Fund may incur losses if any institution providing services such as safekeeping of assets or acting as a derivatives counterparty becomes insolvent.
- ESG screening: The environmental, social and governance screening criteria are embedded with the index selection process, which seeks to exclude bonds issued by companies involved in certain activities. The investment manager is not responsible for monitoring the screening process or confirming that all bonds which pass the screening process are issued by companies with adequate environmental, social or governance standards.
- Credit risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Sub-Fund when due.
